PROFESSIONAL SUMMARY

Results-driven Generative AI Engineer (Fresher) with hands-on experience building AI-powered chatbot systems and deep learning models. Proficient in Python, Flask, and REST API development, with practical exposure to LLM architectures, Prompt Engineering, and Retrieval-Augmented Generation (RAG). Focused on delivering scalable, reliable AI solutions that address real-world problems.

TECHNICAL SKILLS

Programming:	Python
Frameworks & Tools:	Flask, Streamlit
AI / ML:	Generative AI, LLMs, Prompt Engineering, RAG, Model Fine-Tuning, CNN
Vector Databases:	FAISS, Weaviate, ChromaDB
Databases:	MySQL
Cloud Platforms:	Azure OpenAI, Google Vertex AI
Other:	REST API Development, Data Preprocessing, Model Training & Evaluation

PROJECT EXPERIENCE

AI Chatbot — Zara AI

- Developed a Telegram chatbot using Python and the Telegram Bot API for real-time user interaction.
- Implemented logic to process user inputs and deliver relevant, context-based responses.
- Designed structured conversation flows to improve interaction quality and user experience.
- Tested and refined the chatbot to enhance response accuracy and overall performance.

Jaundice Detection System — CNN-Based Medical Image Classifier

- Developed a Convolutional Neural Network (CNN) model for jaundice detection using medical images.
- Applied image preprocessing techniques such as resizing and normalization to prepare data for training.
- Trained and evaluated the model, achieving approximately 85% prediction accuracy.
- Tested and refined the model to improve overall performance and reliability.

EDUCATION

Bachelor of Technology(B.Tech) — Information Technology

M. Kumarasamy College of Engineering, Karur

CGPA: 7.8

CERTIFICATIONS

- Data Science Course — QSpiders (Currently Pursuing)
- AWS Academy Cloud Foundations — Amazon Web Services
- ServiceNow Certified System Administrator
- Japanese Language Proficiency Test — JLPT N5

LANGUAGES

Tamil (Native) | English (Professional) | Japanese (Basic — N5)
